EXAMINER'S AMENDMENT

1. Authorization for this examiner's amendment was given in a telephone interview with Lawrence E. Russ on January 5, 2007.

Claims 20-28 and 72 are cancelled.

2. The following is an examiner's statement of reasons for allowance:

The present invention is directed to an image coding method and apparatus. The independent claims identify the uniquely distinct feature "generating means for generating additional information that controls converting means's performing of the predetermined conversion process such that a mismatch between the converted video stream and the at least another stream is avoided when the converted video stream and the at least another stream are displayed on the common display device, the additional information being based on the multimedia coding data." The closest prior arts, Wang (US Pat. No. 7, 072, 396) and Hori (the article titled, "Annotation of Web content for Transcoding") either singularly or in combination fail to anticipate or render the above underlined limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
